

GARDEN

M A K E M U S I C B L O O M

ABOUT US

garden.stream is an online music discovery platform specialized in next level livestreams: A video clip, recording session and live concert all in one. Our mission is to redefine livestreaming as a contemporary form of presenting music.

Together with artists we co-create high-quality video content, available to a worldwide audience. Watch our [promo video](#) & check out our [website](#)! Our studio is located in the center of Rotterdam, The Netherlands.

Let's make music bloom!

CO-CREATION

Instead of showcasing a predefined studio set up, we establish a co-creative process beforehand with the artists in order to convert their artistic vision into a next level livestream. This starts with an (online) meet & create session where we brainstorm & elaborate on creative ideas for a production plan and set up a marketing strategy.
